

**Theory of Computation (CSC 339) – Fall 2023**

Instructor: Prof. M.B. Menai

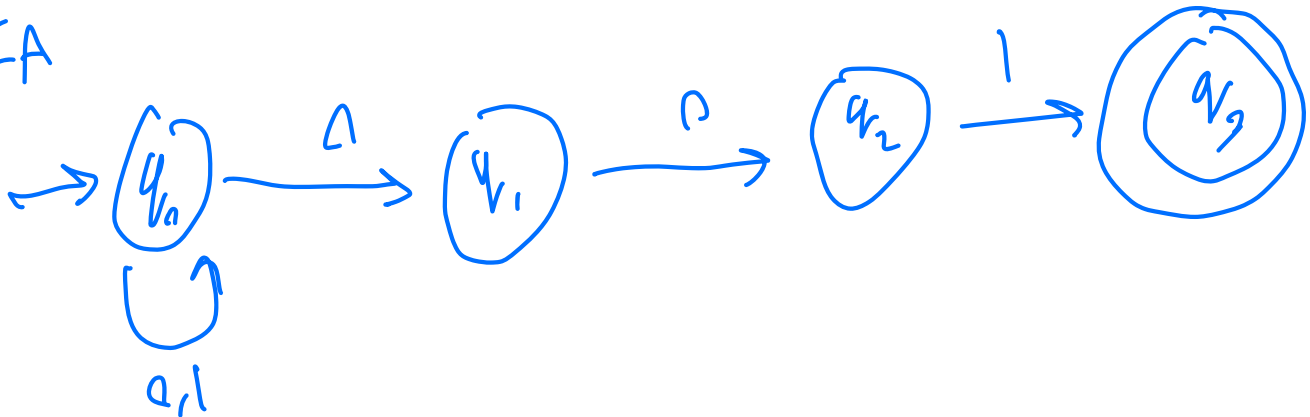

<b>Tutorial 3: Nondeterministic Finite Automata</b>
---

1. Give state diagrams of NFAs with the specified number of states recognizing each of the following languages. In all parts, the alphabet is  $\Sigma = \{0, 1\}$ .
  - (a) The language  $\{w|w \text{ ends with } 001\}$  with four states.
  - (b) The language  $1^*(001^*)^*$  with three states.
  - (c) The language  $\epsilon$  with one state.
  - (d) The language  $0^*$  with one state.
  - (e) The language  $\{w|w \text{ is any string except } 11 \text{ and } 111\}$ .
2. Convert the NFAs obtained in the previous question to DFAs.
3. (3 points) Give the state diagrams of NFAs recognizing the concatenation and the star of the following languages. The alphabet is  $\Sigma = \{0, 1\}$ .
  - (a) The language  $\{w|w \text{ ends with } 001\}$ ; The language  $1^*(001^*)^*$ .
  - (b) The language  $\epsilon$  with one state; The language  $0^*$ .
4. Convert the following regular expressions to NFAs. The alphabet is  $\Sigma = \{0, 1\}$ .
  - (a)  $(0 + 1)^*000(0 + 1)^*$ .
  - (b)  $((00)^*(11) + 01)^*$ .
  - (c)  $\emptyset^*$

1. Give state diagrams of NFAs with the specified number of states recognizing each of the following languages. In all parts, the alphabet is  $\Sigma = \{0, 1\}$ .

(a) The language  $\{w | w \text{ ends with } 001\}$  with four states.

NFA

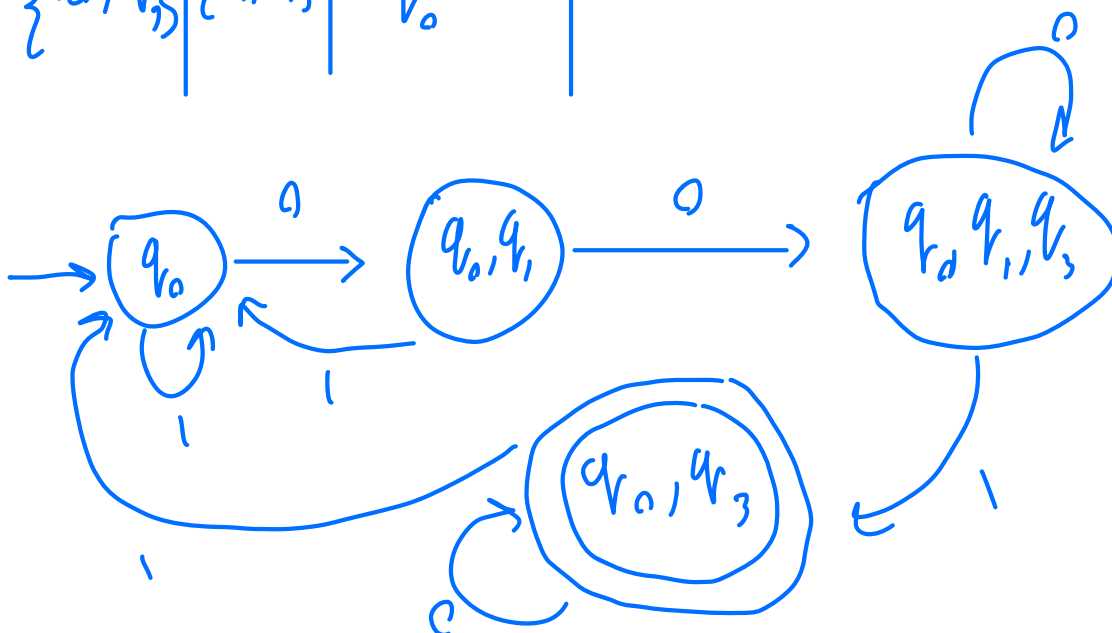

convert to DFA

	0	1
$\rightarrow q_0$	$\{q_0, q_1\}$	$q_0$
$q_0, q_1$	$\{q_0, q_1, q_2\}$	$q_0$
$q_0, q_1, q_2$	$\{q_0, q_1, q_2\}$	$\{q_0, q_3\}^*$
$\{q_0, q_1\}^*$	$\{q_0, q_1\}$	$q_0$

NFA

	0	1
$\rightarrow q_0$	$q_0, q_1$	$q_0$
$q_1$	$q_2$	$\emptyset$
$q_2$	$\emptyset$	$q_3^*$
$*q_3$	$\emptyset$	$\emptyset$

(b) The language  $1^*(001^*)^*$  with three states.

(c) The language  $\epsilon$  with one state.

(d) The language  $0^*$  with one state.

(e) The language  $\{w \mid w \text{ is any string except } 11 \text{ and } 111\}$ .
